## Business Continuity Program Assessment Overview

This assessment module is based upon the requirements of the NFPA1600 Business Continuity standard and will enable users to demonstrate a transparent assessment process, which produces thorough and concise reports as well as the ability to track continuing compliance on a go-forward basis. The module also provides a concise methodology to track the remediation efforts for areas of non-compliance.

GPM™ believes that by using this module owners and operators will significantly enhance their overall compliance efforts regardless of the location of the facility or operation. The module provides selectable compliance levels for each assessment area and allows users to implement the standardized question set as is, or modify it to address an individual facility and operator's needs. The flexibility of the module to be tailored to specific situations by the modification of the base question set is one of its greatest strengths. In fact, previously developed question sets can be readily imported to the module to enhance the database of questions provided.

Use of the BCP NFPA1600 module will reduce assessment and reporting time-frames through a consistent reporting process which presents the data in a readily understood compliance format. The need for consistency of reporting is especially critical for companies who operate multiple, geographically diverse facilities and operations.

This process affords a 50% to 75% saving in time over manual assessment methods.

**GPM** GLOBAL PROTECTIVE™  
MANAGEMENT INC  
*Providing Global Security Solutions*

**1 Comprehensive Knowledge Base** - Pre-loaded with hundreds of detailed questions and control statements. Control statements provide additional information and assist in maintaining consistency in reporting results.

Fully customizable, or you can use our quick import feature to bring in your questions from MS Excel or text format.

**2 Complete Assessment**  
Enter the assessment data on your laptop, desktop, or hand held device...even print paper forms for data entry.

Supplemental file feature allows links to external documents (spreadsheets, word processing, web files) from any assessment question to support the assessment.

**3 Follow Up** - An integrated module automatically creates follow-up actions as you complete your assessments and inspections.

Assign priority to your follow-up, create automatic email "reminders" using revolutionary 3-tiered process, and track the item to completion.

**4 Print Reports** - Assessment reports are instantly available for printing, graphing and electronic distribution. Nine system reports include detailed assessment, graphical summary, follow-up action, trend, general summary, and non-compliance.

SecureAssess™ also exports your assessment data to various formats including HTML, MS Excel and MS Word.

Assessment records are automatically created and stored - proof of your standard of due diligence.

Assessment scores and compliance achievement results calculate instantly.

Fast, easy, and flexible. Reduce assessment time by 50 to 75%.

**SecureAssess™**  
Security Software Solutions

**5 Export to Hand Held**

Hand held portability! No more clip boards or paper! Export your assessment template to your Palm OS PDA or Pocket PC!

Conduct your assessment, then synchronize back to the SecureAssess™ system for reporting and editing. The ultimate in flexibility!

**Designed for:**

- Corporate IT departments
- Business Continuity Managers
- Strategic Planners
- Program management professionals
- Project Managers
- Risk managers
- Facility managers
- Public sector agencies
- Corporate audit services groups
