Healthcare Facilities Security Assessment Overview

Global Protective Management (GPM)™ introduces its Healthcare Facilities Security Assessment module. This module is comprised of over 700 questions specifically designed to assist Healthcare Administrators, Security Personnel, Consultants and Auditors with the evaluation of the level and nature of protections and vulnerabilities that may exist in healthcare facilities and patient care operations. The module provides selectable compliance levels for each area of operation and allows users to implement the standardized question set as is, or modify it to address individual facility and operations' features and needs.

Healthcare facilities have specific security concerns that are not found in most other environments. Maintaining an acceptable level of security in this unique environment is extremely difficult. GPM™ introduces the Healthcare Facilities Security Assessment process that Healthcare security professionals have been waiting for.

GPM's™ Healthcare Facilities Security Assessment allows for customized security assessments that can be conducted in reduced time frames using consistent reporting and measurable compliance formats. This module facilitates detailed security evaluation of critical healthcare operations such as emergency rooms, admissions areas, and pharmacies as well as ancillary operations such as hospital parking areas and shipping and receiving docks. It also reviews emergency operations, evacuation and planning processes including bioterrorism response.

This process affords a 50% to 75% saving in time over standard methods.

GPM GLOBAL PROTECTIVE™
MANAGEMENT INC
Providing Global Security Solutions

1 Comprehensive Knowledge Base - Pre-loaded with hundreds of detailed questions and control statements. Control statements provide additional information and assist in maintaining consistency in reporting results.

Fully customizable, or you can use our quick import feature to bring in your questions from MS Excel or text format.

2 Complete Assessment
Enter the assessment data on your laptop, desktop, or hand held device...even print paper forms for data entry.

Supplemental file feature allows links to external documents (spreadsheets, word processing, web files) from any assessment question to support the assessment.

3 Follow Up - An integrated module automatically creates follow-up actions as you complete your assessments and inspections.

Assign priority to your follow-up, create automatic email "reminders" using revolutionary 3-tiered process, and track the item to completion.

4 Print Reports - Assessment reports are instantly available for printing, graphing and electronic distribution. Nine system reports include detailed assessment, graphical summary, follow-up action, trend, general summary, and non-compliance.

SecureAssess™ also exports your assessment data to various formats including HTML, MS Excel and MS Word.

Assessment records are automatically created and stored - proof of your standard of due diligence.

Assessment scores and compliance achievement results calculate instantly.

Fast, easy, and flexible. Reduce assessment time by 50 to 75%.

SecureAssess™
Security Software Solutions

5 Export to Hand Held
Hand held portability! No more clip boards or paper! Export your assessment template to your Palm OS PDA or Pocket PC!
Conduct your assessment, then synchronize back to the SecureAssess™ system for reporting and editing. The ultimate in flexibility!

Designed for:

- Corporate security departments
- Individual security practitioners
- Security analysts/consultants
- Program management professionals
- Department/agency security resources
- Risk managers
- Facility managers
- Public sector security
- Corporate audit services groups
