Supply Chain Security Assessment Overview

Global Protective Management (GPM)™ introduces its Supply Chain Security Assessment module. This module is comprised of over 360 questions specifically designed to assist, manufacturers, freight forwarders, exporters and importers, their Security Personnel, Consultants and Auditors, with the evaluation of the level and nature of protections and vulnerabilities that may exist in their supply chain and facilities. This assessment process, is based upon the requirements of both the C-TPAT and PIP programs and will enable companies to demonstrate a transparent process, which produces thorough and concise reports as well as the ability to track remediation of security shortfalls or vulnerabilities. We believe that by using this assessment process companies will enhance their overall chances of being certified by US and Canadian Customs. The module provides selectable compliance levels for each area of operation and allows users to implement the standardized question set as is, or modify it to address individual facility and operations' features and needs.

Companies across the supply chain have specific security concerns that are not found in most other environments. Maintaining an acceptable level of security in this unique environment is extremely difficult. GPM™ introduces the Supply Chain Security Assessment process that automates and simplifies the process, which is what industrial and organizational, security professionals have been waiting for.

GPM's™ Supply Chain Security Assessment allows for security assessments that address the C-TPAT AND PIP guidelines. These assessments can be conducted in reduced time frames using consistent reporting and measurable compliance formats. This module facilitates consistent, detailed security evaluation of supply chain facilities, sites, operational procedures and controls. The need for consistency of reporting is especially critical for companies who operate multiple, geographically diverse facilities and operations

This process affords a 50% to 75% saving in time over manual assessment methods.

GPM GLOBAL PROTECTIVE™
MANAGEMENT INC
Providing Global Security Solutions

1 Comprehensive Knowledge Base - Pre-loaded with hundreds of detailed questions and control statements. Control statements provide additional information and assist in maintaining consistency in reporting results.

Fully customizable, or you can use our quick import feature to bring in your questions from MS Excel or text format.

2 Complete Assessment
Enter the assessment data on your laptop, desktop, or hand held device...even print paper forms for data entry.

Supplemental file feature allows links to external documents (spreadsheets, word processing, web files) from any assessment question to support the assessment.

3 Follow Up - An integrated module automatically creates follow-up actions as you complete your assessments and inspections.

Assign priority to your follow-up, create automatic email "reminders" using revolutionary 3-tiered process, and track the item to completion.

4 Print Reports - Assessment reports are instantly available for printing, graphing and electronic distribution. Nine system reports include detailed assessment, graphical summary, follow-up action, trend, general summary, and non-compliance.

SecureAssess™ also exports your assessment data to various formats including HTML, MS Excel and MS Word.

Assessment records are automatically created and stored - proof of your standard of due diligence.

Assessment scores and compliance achievement results calculate instantly.

Fast, easy, and flexible. Reduce assessment time by 50 to 75%.

SecureAssess™
Security Software Solutions

5 Export to Hand Held
Hand held portability! No more clip boards or paper! Export your assessment template to your Palm OS PDA or Pocket PC!
Conduct your assessment, then synchronize back to the SecureAssess™ system for reporting and editing. The ultimate in flexibility!

Designed for:

- Corporate security departments
- Individual security practitioners
- Security analysts/consultants
- Program management professionals
- Department/agency security resources
- Risk managers
- Facility managers
- Public sector security
- Corporate audit services groups
